

# JEFERSON JOSE POLASTRI BARBOSA

## SYSTEMS ANALYST & FULL-STACK DEVELOPER

**Location:** London, United Kingdom (Open to Relocation / Remote)

**Email:** jefersonpolastri@icloud.com

**LinkedIn:** linkedin.com/in/jeferson-polastri

**GitHub / Portfolio:** github.com/jefersonpolastri

### PROFESSIONAL PROFILE

Highly analytical and results-driven Systems Analyst and Full-Stack Developer with over 7 years of dedicated experience in software version control, relational database management, and enterprise workflow automation. Specialist in orchestrating TOTVS Protheus ERP deployments, leveraging ADVPL and Python (Django) to build custom modules, high-performance RESTful APIs, and live management dashboards. Adept at agile technical requirements gathering, translating complex business needs into scalable digital infrastructure. Currently based in London to enhance professional British English, offering a strong cross-functional background in logistics and production planning that bridges the gap between technical execution and business operations.

### CORE COMPETENCIES

|                                   |                                                                                                            |
|-----------------------------------|------------------------------------------------------------------------------------------------------------|
| <b>Programming &amp; Logic:</b>   | ADVPL (TOTVS Protheus), Python (Django), TDD (Test-Driven Development), MVC Architecture, Design Patterns. |
| <b>Automation &amp; APIs:</b>     | RESTful APIs Integration, Workflow Automation, n8n, AI Agents, Z-API & WhatsApp Integrations.              |
| <b>Databases &amp; BI:</b>        | MSSQL Server (Stored Procedures, Complex Queries), Oracle (ACID/CRUD), MongoDB, SQLite3, Power BI.         |
| <b>Low-Code Ecosystems:</b>       | FlutterFlow, Bubble (Rapid Application Prototyping & Dynamic Database Relationships).                      |
| <b>Methodologies &amp; Tools:</b> | Requirements Gathering, Version Control, Git/VS Code, Agile Project Management, Systems Infrastructure.    |

### PROFESSIONAL EXPERIENCE

Mid-level Systems Analyst & Lead ERP Developer2023 – 2026

UCELO – Brazil / International

- **ERP Implementation Leadership:** Successfully spearheaded the comprehensive technical migration and deployment of the TOTVS Protheus ERP system (Jan 2025).
- **Custom Software Engineering:** Engineered tailored internal subroutines, complex database triggers, and advanced performance reporting modules utilizing ADVPL and SQL Server.
- **Business Intelligence:** Conducted thorough technical requirement-gathering workshops across departments to design real-time executive Power BI dashboards, significantly improving data-driven decision-making.
- **Modern Integrations & AI:** Pioneered automated internal workflows and external connection systems using RESTful APIs, n8n, and custom communication hooks (such as purchasing processes automated via WhatsApp Z-API).

## Junior Systems Analyst

2019 – 2023

### UCELO

- Analysed data pipelines and modernised legacy workflows, reducing processing blockages and enhancing daily operational efficiency.
- Managed software patches, critical updates, and strict version control protocols for enterprise management tools.
- Developed structured internal performance reviews and ad-hoc data analysis reports for department heads.

## Production Planner (PPC)

2016 – 2018

### UCELO

- Optimised complex factory shifts and calculated highly accurate raw material consumption metrics for large-scale production.
- Managed dynamic scheduling and output requirements for 5 critical industrial injection moulding machines based on stock levels and predictive sales data.

## Logistics Assistant

2013 – 2016

### UCELO

- Managed freight quotations and negotiations, conducted cargo volume optimization analysis, and built strategic partnerships with international and domestic suppliers.

## Network Infrastructure Technician

2011 – 2012

### ECD MULTICABOS

- Installed, configured, and certified high-speed CAT5/CAT6 network cabling topologies and fiber optic lines.
- Assembled server racks, managed physical cable layouts, and troubleshooted core network hardware infrastructure for commercial clients.

## EDUCATION & CREDENTIALS

### Immersive Professional English Programme

2026 – Present

*Language Studies Academic Block – London, United Kingdom*

### BSc in Systems Analysis and Development

Graduated 2024

*UNOPAR (University of Northern Paraná, Brazil)*

### Technical Diploma in Systems Analysis & Databases

Graduated 2016

*SENAI (National Service for Industrial Training, Brazil)*

### Key Professional Certifications

Continuous Learning

*MongoDB for SQL Experts | Oracle Explorer | ADVPL Specialist (Basic to Advanced) | Python Software Development (Basic to Advanced)*

## LANGUAGES

- **Portuguese:** Native speaker
- **English:** Intermediate (B1) / Professional Advancement (Currently immersion-studying in London)
